# WHAT DO WE DO?

- » Wav News is a small, student run organization that tackles the news and history of music from many different time periods and places.
- » It creates written and visual content that educates people while also giving students the ability to have a platform to practice journalism, writing, editing, managing, and producing.
- » They are located in San Luis Obispo and they say that they want something that mimics old newscasts that preceded movies but with a modern feel.
- » They said that they were thinking of having a radio tower on top of the world, with "Wav Wav Wav" rotating around the tower
